Bridgeport Tool & St

Bridgeport Tool & Stamping Corporation offers 60 years of experience in the design and fabrication of precision tools, dies and custom metal stampings. Backed by our modern color CAD/CAM system, state-of-the-art Wire EDM and other modern machine tools and finishing equipment, Bridgeport Tool & Stamping is fully equipped to handle all your tool or precision metal stamping requirements.

We serve both Fortune 500 firms and smaller companies worldwide in such diverse industries as Electronics, Medical, Aerospace, Electro-Mechanical, Telecommunications and others – specializing in difficult and unusual applications in such high technology materials as Beryllium Copper, Inconel, heat treated stainless and high carbon steels.

All tools and dies are designed and manufactured in-house by experienced toolmakers and machinists, all dedicated to your total satisfaction. Our facilities include over 20

Stamping Corporation

presses for both high production and secondary operations. From our 150 ton straight side press to our smallest 20 ton capacity press, we can handle all your metal stamping requirements, both large and small.

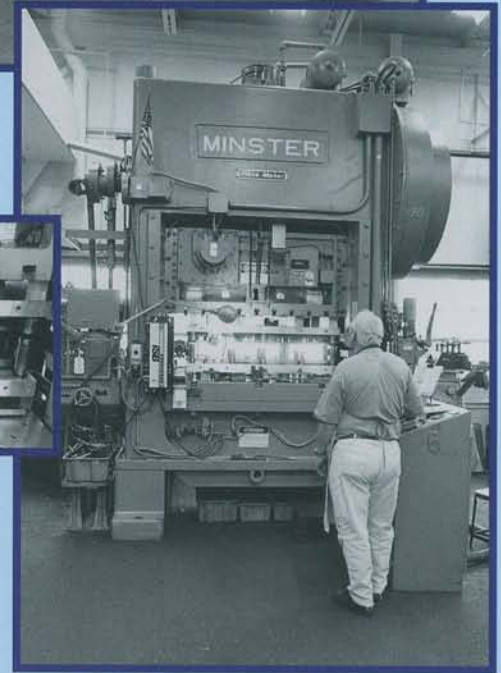

Our Quality Control Manual is certified to MIL-45208A, and our precision inspection and measurement instruments are traceable to the American Bureau of Standards and maintained in accordance with MIL-STD-45662A. Computer generated SPC techniques are employed throughout the production process to meet each customer's quality requirements.

At Bridgeport Tool & Stamping, we pride ourselves in providing only the highest quality tooling and stampings at competitive prices. We look forward to demonstrating this quality and dependability on your next tool or metal stamping project.
